

Day 3 of training

TOPICS :- 1) CHECKBOX ,FILE ,URL

2) More input tag

3) form using table tag

4) block or inline elements

5)fields and legend set

6) tags:—> detail,embed,video,html

entities,abbr,datalist,figcaption,bdo,captiontag,pre and template tag ,iframe and sandbox ,sig,meta semantic non semantic tag ,html Image map

1) Checkbox, File, URL Inputs

- `<input type="checkbox">`: Allows users to select one or more options.
- `<input type="file">`: Lets users upload files from their device.
- `<input type="url">`: Accepts valid URL format (e.g., <https://example.com>).

2) More Input Types

- text: Single-line input
- password: Hides characters
- email: For email format
- number: Accepts numbers
- radio: Select one option
- date, color, range: For specific data types

4) Block vs Inline Elements

- Block elements: Start on a new line, take full width Examples: `<div>`, `<p>`, `<h1>`
- Inline elements: Stay in line with text Examples: `<span>`, `<a>`, `<img>`

5)fieldset & legend

- `<fieldset>`: Groups related form elements

- <legend>: Title for the group
- <fieldset>
- <legend>Personal Info</legend>
- <input type="text" placeholder="Name">
- </fieldset>
-

6) Tag	Use	
-----	-----	
`<details>`	Shows hidden info when clicked	
`<embed>`	Embeds media (PDF, videos, etc.)	
`<video>`	Embeds a video player	
HTML Entities	Special symbols like `<`, `©`	
`<abbr>`	Abbreviation (`<abbr title="HyperText Markup Language">HTML</abbr>`)	
`<datalist>`	Dropdown for input suggestions	
`<figcaption>`	Caption for image/figure	
`<bdo>`	Bi-directional override (e.g., RTL text)	
`<caption>`	Title for a table	
`<pre>`	Preformatted text (preserves spacing)	
`<template>`	Hidden HTML for future JavaScript use	
`<iframe>`	Embed another webpage inside	
` sandbox`	Restricts iframe actions (security)	
`<meta>`	Metadata (author, charset, etc.)	
`<samp>`	Sample output from programs	
Semantic tags	Tags with meaning (e.g., `<header>`, `<footer>`)	
Non-semantic tags	No meaning, only structure (e.g., `<div>`, `<span>`)	
Image Map	Clickable areas on an image using `<map>` & `<area>`
